Ask about this product

Manufacturer	Mitsubishi
Catalog number	mr-j3-40b-rj004u501
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Voltage/Frequency	3-phase 200 to 230VAC, 50/60Hz or 3-phase 380 to 480VAC, 50/60Hz V/Hz
Permissible Voltage Fluctuation	170 to 253VAC for 3-phase 200 to 230VAC input; 323 to 528VAC for 3-phase 380 to 480VAC input V
Permissible Frequency Fluctuation	Within 5%
Linear Servo Motor Compatibility	Compatible with LM-H2 series linear servo motors
Brand	Mitsubishi
Part Number	MR-J3-40B-RJ004U501
Rated Current	63.0 A
Rated Voltage	1.5 V
Compatibility	Linear Servo Motors

Description

The Mitsubishi MR-J3-40B-RJ004U501 is a high-performance AC servo amplifier designed for precise motion control in industrial automation applications. As part of the MR-J3 series, this model offers advanced features and robust construction to meet the demands of various automation tasks.

Key characteristics include a rated current of 3-phase 323VAC 63.0A, a rated voltage of 1.5V, and compatibility with linear servo motors, particularly the LM-H2 series. The amplifier operates within a permissible voltage fluctuation of 170 to 253VAC for 3-phase 200 to 230VAC input and 323 to 528VAC for 3-phase 380 to 480VAC input.

It supports both 3-phase and 1-phase power supplies, with a permissible frequency fluctuation within 5%. Designed for reliability and precision, the MR-J3-40B-RJ004U501 is suitable for applications requiring high-speed and high-precision motion control.
