Ask about this product

Manufacturer	Siemens
Catalog number	6es7155-6bu01-0cn0-6es7193-6pa00-0aa0
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Product Type	Interface Module
Product Family	ET 200SP
Max I/O Modules	32 modules
Max I/O Data	244 bytes
Power Supply	24 V DC
Bus Connection	RS485 interface

Description

The Siemens 6ES7 155-6BU01-0CN0 is an Interface Module (IM) designed for the SIMATIC ET 200SP distributed I/O system, facilitating seamless communication between the system and PROFIBUS DP networks. This module is part of the ET 200SP product family, which offers scalable and flexible solutions for industrial automation applications.

Key features of the 6ES7 155-6BU01-0CN0 include its ability to connect up to 32 I/O modules and 16 ET 200AL modules, supporting a maximum of 244 bytes of I/O data. It operates with a 24 V DC power supply (SELV/PELV) and utilizes an RS485 interface for bus connection.

The module is typically bundled with the server module (6ES7 193-6PA00-0AA0) and a PROFIBUS FastConnect bus connector (6ES7 972-0BB70-0XA0), ensuring a comprehensive solution for distributed I/O configurations.

This configuration is standard for ET 200SP CPUs and Interface Modules, eliminating the need for separate procurement of the server module.
