Manufacturer	Siemens
Catalog number	6fx1137-3ba00-6fx1131-5ba01
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Manufacturer	Siemens
Part Number	6FX1137-3BA00 6FX1131-5BA01
Product Type	Active Serial Interface Module
Serial Interfaces	3 x RS232/TTY
Application Area	CNC Systems

Description

The Siemens 6FX1137-3BA00 and 6FX1131-5BA01 are integral components of the SINUMERIK 880 CNC system, designed to enhance machine control capabilities. The 6FX1137-3BA00 serves as an active serial interface module, providing three RS232/TTY serial interfaces for communication between the CNC system and external devices.

This module is essential for establishing reliable data exchange channels, ensuring seamless integration with peripherals such as operator panels and external computers. The 6FX1131-5BA01 functions as an active RS232C (V.24) module, offering two RS232/TTY serial interfaces.

It facilitates configuration and active computer link interfaces, enabling efficient communication within the SINUMERIK 880 system. Both modules are characterized by their robust construction and compatibility with the SINUMERIK 880 series, ensuring reliable performance in demanding industrial environments.

These modules are typically used in applications requiring precise control and communication, such as CNC machining centers, milling machines, and lathes. Their design and functionality support the high-speed data transfer and real-time processing demands of modern manufacturing processes.
