## Description

The Siemens C98043-A1236-L22 is a power supply module designed for the SIMOVERT P drive system, specifically the 6SE11 A2 FBG-STROMVERS. U ANSTEUERUNG model. This module ensures reliable power distribution and control within the drive system, contributing to optimal performance and efficiency.

Its robust design and compatibility with the SIMOVERT P series make it a critical component for industrial automation applications requiring precise power management.
