## Description

The Siemens OP1-240/5, identified by part number 6AV1132-0DA10, is a compact operator panel designed for straightforward human-machine interface (HMI) applications. This panel features a 2-line LCD display, each capable of showing up to 40 characters, with a character height of 5mm, ensuring clear visibility for operational status messages.

It offers interfaces for TF1, TF2, or TF3 receptacles, facilitating seamless integration with various Siemens control systems. The OP1-240/5 is ideal for machine control, industrial automation, process monitoring, and HMI stations, particularly in small control systems.

Its straightforward design and functionality make it a reliable choice for operators seeking efficient and effective HMI solutions.
