Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Manufacturer	Siemens
Part Number	S30861-U4266-X-C4/01
Product Type	GSM Base Transceiver Station Module
Application Area	Telecommunications
Category	Podzespoły automatyki przemysłowej

Description

The Siemens S30861-U4266-X-C4/01 is a specialized module designed for integration within Siemens' GSM base transceiver stations (BTS), specifically the BS-240/241 series. This module plays a crucial role in enhancing the functionality and performance of GSM networks by providing essential processing capabilities.

It is engineered to support dual-band operations, accommodating both GSM900 and GSM1800 frequencies, thereby facilitating seamless communication across different network configurations. The module's design ensures compatibility with the modular architecture of the BS-240/241 BTS, allowing for flexible site configurations and efficient network expansion.

Its integration contributes to the overall reliability and scalability of GSM infrastructure, making it a vital component for telecommunications providers aiming to maintain robust and adaptable network systems.
