### Description

The ABB 3HAC020465-001, also known as DSQC 626, is a power supply unit designed for ABB's IRC5 robot controller. This component ensures stable and reliable power delivery, which is crucial for the optimal performance of industrial robotic systems. The DSQC 626 is recognized for its durability and efficiency, making it a preferred choice for maintaining and upgrading ABB robotic equipment. Its compatibility with the IRC5 controller underscores its importance in the ABB robotics ecosystem, serving as a vital link between the controller and the robot's operational capabilities.
