

3HAC025097-001

Industrial automation components

Manufacturer	Abb
Catalog number	3hac025097-001
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	1.13 kgs
Product Type	Main Computer Module
Operating Voltage	220 V
Output Frequency	50 kHz
Dimensions	119 mm x 102 mm x 45 mm
Weight	0.76 kg

Description

The ABB DSQC639 3HAC025097-001 is a high-performance main computer module designed for seamless integration into complex industrial automation systems. Engineered by ABB, a leader in industrial automation, this module offers exceptional precision and reliability, making it ideal for demanding manufacturing environments. Key features include advanced connectivity options such as Ethernet and RS232, facilitating efficient communication between control systems and peripherals. Its robust construction ensures durability and longevity, capable of withstanding harsh industrial conditions. The DSQC639 supports the IRC5 operating system, providing a stable and efficient platform for automation tasks. With a modular design, it allows for easy upgrades and maintenance, ensuring your automation system remains up-to-date and efficient. The module's compact dimensions and user-friendly interfaces simplify installation and configuration processes, minimizing downtime and maximizing productivity. Backed by ABB's commitment to quality and customer support, the DSQC639 3HAC025097-001 comes with comprehensive documentation and technical assistance, ensuring optimal system integration and operation.
