

3HAC12816-1/06

Industrial automation components

Manufacturer	Abb
Catalog number	3hac12816-106
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Brand	ABB
Part Number	3HAC12816-1/06
Product Type	Robot Communication Board
Controller Compatibility	ABB IRC5
Data Transmission Capabilities	Robust

Description

The ABB 3HAC12816-1/06, also known as DSQC602, is a Robot Communication Board designed for integration with ABB's IRC5 robot controller. This interface module facilitates seamless communication between the robot controller and connected peripherals, ensuring efficient data exchange and system performance. Key features include robust data transmission capabilities, compatibility with ABB's IRC5 controller, and a compact design suitable for various industrial automation applications. This module is essential for maintaining optimal communication within robotic systems, contributing to enhanced operational efficiency and reliability.
