

DSQC-266T 3HAB8802-1/2B

Industrial automation components

Manufacturer	Abb
Catalog number	dsqc-266t-3hab8802-12b
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Manufacturer	Abb
Part Number	DSQC-266T 3HAB8802-1/2B
Product Type	Servo Amplifier Board
Application Area	Industrial Robotics
Weight	2.29 kg
Product Family	DSQC Series

Description

The ABB DSQC-266T 3HAB8802-1/2B is a servo amplifier board designed for ABB industrial robots, ensuring precise control and reliable performance in robotic applications. This component is integral to the robot's drive system, facilitating accurate motion control and operational efficiency. The DSQC-266T is compatible with various ABB robotic models, providing versatility in different automation setups. Its robust design and high-quality construction make it suitable for demanding industrial environments, offering durability and longevity. This servo amplifier board is essential for maintaining optimal performance and extending the operational lifespan of ABB robotic systems.
