

## YB560103-BN

Industrial automation components

<b>Manufacturer</b>	Abb
<b>Catalog number</b>	yb560103-bn
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Weight</b>	1.72 kgs
<b>Product Type</b>	CPU Control Board
<b>Product Family</b>	DSQC230
<b>Compatibility</b>	ABB S2-S3 Series
<b>Application Area</b>	Industrial Automation Systems
<b>Weight</b>	1.72 kg

### Description

The ABB YB560103-BN is a DSQC230 CPU Control Board designed for S2-S3 series industrial automation systems. This module serves as a central processing unit, managing and controlling various operations within the system. It is engineered for high reliability and performance, ensuring seamless integration and operation in demanding industrial environments. The YB560103-BN is compatible with ABB's S2-S3 series, offering a robust solution for complex automation tasks. Its design emphasizes durability and efficiency, making it a critical component for maintaining optimal system performance. This control board is suitable for applications requiring precise control and monitoring, contributing to enhanced productivity and operational stability.
