### Description

The Allen-Bradley 1336-B003-E0D-L3 drive is designed for operation with AC voltage and a current of 6A. It offers a motor power of 3 kW and operates at a frequency of 60 Hz. The product supports a signal level of 460, making it an ideal solution for applications requiring precise control. The relay specification is also 460, ensuring high reliability and performance in demanding industrial conditions.
