### Description

The 1745-E103 is an advanced controller from Allen-Bradley, designed to operate within a voltage range of 10 to 30 V AC. The device supports frequencies of 50-60 Hz, making it a versatile solution for various industrial applications. The signal type is 200, and the signal level is also 200, ensuring stable and reliable performance. The relay specification is 240, further enhancing its functionality in automation systems.
