### Description

The Allen-Bradley 20AD014A3AYNANNN drive is a sophisticated device designed for efficient motor control with a power rating of 7.5 kW. It operates at a voltage of 480 V and a current of 14 A, ensuring high performance and reliability in demanding industrial environments. The drive also features a cooling capacity of 7.5 kW, allowing for prolonged operation without the risk of overheating. Both the signal type and signal level are at 480, making it an ideal solution for complex industrial applications.
