

2711-T5A2L1

Industrial automation components

| | |
|-----------------------|----------------------------------|
| Manufacturer | Allen-Bradley |
| Catalog number | 2711-t5a2l1 |
| Category | Industrial automation components |
| Product type | Industrial automation components |
| Status | Active product |

Technical specification

| | |
|----------------------------|-----------|
| Voltage | 24 V |
| Signal Type | 24 |
| Cable Specification | 256 × 128 |
| Signal Level | 24 V |

Description

The Allen-Bradley 2711-T5A2L1 operator interface terminal is an advanced device designed for interaction with automation systems. It operates at a voltage of 24V, ensuring stable power supply. Featuring a display resolution of 256 × 128, it allows for clear data presentation. Both the signal type and signal level are also 24, ensuring consistency in communication with other system components. This is an ideal solution for industrial applications requiring reliable and efficient operation.
