

0-608-750-083

Industrial automation components

Manufacturer	Bosch Rexroth
Catalog number	0608750083
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Current	35 A
Signal Level	230 V
Component Specifications	vm300
Product Type	Power Supply Module
Input Voltage	3-phase 230V
Output Current	35A
Dimensions	70 mm x 295 mm x 260 mm
Weight	1.00 kg

Description

The Bosch Rexroth 0-608-750-083 is a high-performance power supply module designed for industrial automation applications. This VM300 series power supply delivers a robust 35A output, operating efficiently on a 3-phase 230V input, ensuring reliable power distribution for demanding automation systems. With compact dimensions of 70 mm in height, 295 mm in length, and 260 mm in width, and a weight of 1.00 kg, it is engineered for easy integration into various industrial setups. The power supply is housed in a durable enclosure, providing protection against environmental factors and ensuring longevity in industrial environments. Its design emphasizes energy efficiency and consistent performance, making it a valuable component for enhancing the reliability and efficiency of automation processes.
