Manufacturer	Bosch Rexroth
Catalog number	fwa-cml75-xlc-14v22-d0
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Manufacturer	Bosch Rexroth
Part Number	FWA-CML75*-XLC-14V22-D0
Product Type	Programmable Logic Controller (PLC) System
Control Type	Integrated Control
Communication Protocol	Ethernet-based Real-time Communication with Sercos Automation Bus
Motion Control Functionality	Synchronized Motion Control

Description

The Bosch Rexroth FWA-CML75*-XLC-14V22-D0 is an advanced programmable logic controller (PLC) system designed for industrial automation applications. Manufactured by Bosch Rexroth, this model is part of the CML series, known for its integrated control solutions. The FWA-CML75*-XLC-14V22-D0 offers state-of-the-art control hardware with numerous expansion options, ensuring scalability and adaptability in various automation scenarios. It features the latest PLC kernel, 2nd generation, based on CoDeSys V3, providing enhanced performance and flexibility. The system supports Ethernet-based real-time communication with the Sercos automation bus, facilitating high-speed data exchange and synchronization across devices. Additionally, it includes synchronized Motion Control functionality, enabling precise and coordinated movement control for complex automation tasks. This PLC system is ideal for applications requiring reliable and efficient control solutions, such as manufacturing processes, material handling, and robotics. Its robust design and advanced features make it a valuable component in modern industrial automation systems.
