

KM 2200-T

Industrial automation components

Manufacturer	Bosch Rexroth
Catalog number	km-2200-t
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	4.98 kgs
Voltage	DC
Current	50 A
Manufacturer	Bosch
Signal Level	520 V
Relay Specifications	50 A

Description

The Bosch Rexroth KM 2200-T is a high-performance servo capacitor module designed for industrial automation applications. Manufactured by Bosch, this module is part of the SERVODYN series, known for its reliability and precision in motion control systems. The KM 2200-T operates with a direct current (DC) voltage of 520V and supports a current of 50A, making it suitable for demanding automation tasks. It features a capacitance of 2200 μ F, ensuring stable power supply and efficient energy management. The module is housed in a robust enclosure, weighing approximately 4.98 kg, facilitating easy integration into existing systems. Its compact design and high power handling capabilities make it ideal for applications requiring precise and reliable servo control. Whether used in new installations or as a replacement in existing systems, the KM 2200-T offers exceptional performance and durability.
