

### VM 60-T

Industrial automation components

<b>Manufacturer</b>	Bosch Rexroth
<b>Catalog number</b>	vm-60-t
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Weight</b>	9.43 kgs
<b>Current</b>	60 A
<b>Product Type</b>	Module
<b>Manufacturer</b>	Bosch
<b>Signal Level</b>	520 V
<b>Relay Specifications</b>	60 A
<b>Frequency</b>	50
<b>Signal Type</b>	380

### Description

The Bosch Rexroth VM 60-T is a high-performance power supply module designed for industrial automation applications. Manufactured by Bosch Rexroth, this module is part of the VM series, known for their reliability and efficiency. The VM 60-T operates with a 230 V input voltage and supports 3-phase operation, delivering a rated load of 2 HP. It features dynamic speed regulation, ensuring precise control in various industrial settings. The module provides balanced power distribution and includes built-in overvoltage and short-circuit protections, enhancing its durability and safety. Its compact and rugged design, along with CE and UL approvals, guarantees reliable performance in demanding environments. The VM 60-T is suitable for applications requiring stable and efficient power supply solutions, such as servo drives and other automation systems.
