

### VM60/EB

Industrial automation components

<b>Manufacturer</b>	Bosch Rexroth
<b>Catalog number</b>	vm60eb
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Weight</b>	8.16 kgs
<b>Voltage</b>	380 V
<b>Current</b>	60 A
<b>Product Type</b>	Drive
<b>Relay Specifications</b>	380 VAC
<b>Frequency</b>	50 Hz
<b>Signal Type</b>	380
<b>Signal Level</b>	380 V

### Description

The Bosch Rexroth VM60/EB is a high-performance power supply module designed for industrial automation applications. Operating within the VM Amplifier Drives series, it accepts a three-phase AC input of 400V at 50Hz and delivers a stable DC output of 520V at 60A. This module is engineered to provide precise voltage control and efficient performance, ensuring reliable operation in demanding environments. Its robust design facilitates seamless integration into various industrial systems, making it an ideal choice for applications requiring consistent and dependable power supply solutions.
