

VM60/R-T

Industrial automation components

Manufacturer	Bosch Rexroth
Catalog number	vm60r-t
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Product Type	Power Supply Module
Input Voltage	400V
Input Frequency	50Hz
Output Voltage	520V
Output Current	60A
Dimensions	320mm x 110mm x 400mm
Weight	8.68kg

Description

The Bosch Rexroth VM60/R-T is a high-performance power supply module designed for industrial automation applications. Part of the SERVODYN range, this module delivers a DC output of 520V at 60A, ensuring reliable power distribution for demanding systems. It operates with a 3-phase AC input of 400V at 50Hz, making it suitable for various industrial environments. The module's robust construction and advanced features provide stable and efficient power conversion, contributing to the overall performance and longevity of automation equipment.
