| Product Type | Sensor |

Description

The EATON 1411D-6501 sensor operates within a voltage range of 115-125V and a frequency of 50-60Hz. It provides measurement within the same voltage range, making it an ideal solution for monitoring and controlling electrical systems. The signal type is 125, ensuring high precision in measurements. The signal level also stands at 125, confirming its reliability in industrial applications.
