Manufacturer	Eaton
Catalog number	da1-34030fb-b55c
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Input Voltage	480 V AC
Output Voltage	460 V AC
Rated Operational Current	30 A
Power Output	20 hp
Enclosure Rating	IP55/NEMA 12
Dimensions	16.45 x 9.44 x 6.29 inches
Weight	20.28 lb

Description

The Eaton PowerXL DA1-34030FB-B55C is an advanced variable frequency drive designed for industrial automation applications. Manufactured by Eaton, this model offers precise motor control and energy efficiency for various machinery.

Key features include an input voltage of 480 V AC, output voltage of 460 V AC, and a rated operational current of 30 A. It delivers a power output of 20 horsepower (15 kW) and is equipped with an internal radio frequency interference (RFI) filter to minimize electromagnetic disturbances.

The drive is housed in an IP55/NEMA 12 enclosure, ensuring protection against dust and water ingress, making it suitable for demanding environments. Additionally, it features a brake chopper for dynamic braking applications.

The drive measures 16.45 inches in length, 9.44 inches in height, and 6.29 inches in width, with a weight of 20.28 pounds. Compliance with international standards such as CE, UL, and RoHS underscores its reliability and safety.
