

## SRB-NA-R-C.39/CH2-24V

Industrial automation components

<b>Manufacturer</b>	Elan
<b>Catalog number</b>	srb-na-r-c39ch2-24v
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Legacy / discontinued

### Technical specification

<b>Weight</b>	0.27 kgs
<b>Current</b>	2 A
<b>Measurement Range</b>	2 - 24
<b>Signal Level</b>	24 V
<b>Relay Specifications</b>	230 VAC
<b>Product Type</b>	Controller
<b>Signal Type</b>	24

### Description

The Elan SRB-NA-R-C.39/CH2-24V is a safety relay designed for industrial automation applications, particularly for monitoring guard doors and emergency-stop circuits. This relay operates with a 24V DC input and provides a 2A output, suitable for controlling safety devices in machinery and equipment. It features a 230V AC relay specification, allowing it to interface with various industrial control systems. The device is housed in an IP20/40 enclosure, offering protection against dust and water ingress, which is essential for maintaining operational reliability in industrial environments. The SRB-NA-R-C.39/CH2-24V is discontinued by the manufacturer but remains a valuable component for existing systems requiring maintenance or replacement. Its robust design and specific functionality make it a reliable choice for enhancing safety measures in industrial settings.
