Manufacturer	Fanuc
Catalog number	a02b-0216-b501rack
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Product Type	Control Rack Chassis
Model Series	Series 16/18/21 Model A/B/C
Slot Configuration	2-slot
Cooling Feature	Fan-equipped
Application Area	CNC Systems

Description

The Fanuc A02B-0216-B501 is a specialized control rack chassis designed for Fanuc Series 16/18/21 Model A/B/C CNC systems. This module features a 2-slot configuration with a fan for optimal cooling, ensuring reliable operation in demanding industrial environments.

It is an integral component for enhancing the performance and efficiency of CNC machinery, providing precise control and seamless integration into existing setups. The A02B-0216-B501 is suitable for various applications, including advanced machining and CNC milling, where high precision and reliability are paramount.

Please note that due to high demand, availability may be limited, and a core exchange may be required. For detailed specifications and compatibility, refer to the manufacturer's datasheet or consult with authorized distributors.
