### Description

The Fanuc A03B-0819-C154 is a digital output module (model A0D16D) designed for industrial automation applications. It features 16 digital output points, each capable of handling 0.5 A, and operates within a voltage range of 12 to 24 VDC. This module is part of Fanuc's A03B-0819 series, ensuring compatibility with other components in the series. Its robust construction and precise control capabilities make it suitable for controlling devices such as motors and solenoids in demanding industrial environments. The module is CE and UL certified, meeting international safety standards. Its compact dimensions (35 mm in height, 130 mm in length, and 140 mm in width) and lightweight design (approximately 0.5 kg) facilitate easy integration into existing systems. Whether used in new installations or as a replacement in existing setups, the A03B-0819-C154 offers reliable performance and durability.
