

A06B-0238-B605#S000

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-0238-b605s000
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	14.06 kgs
Voltage	240 V
Horsepower	2.7 KW
Cooling Capacity	2.7 kW
Product Type	Motor
Signal Type	240
Power	2.7 kW
Frequency	50 - 60 Hz
Signal Level	240 V
Relay Specifications	240 VAC

Description

The Fanuc A06B-0238-B605#S000 is a high-performance AC servo motor from Fanuc's AiS12/4000 series, engineered for precision and reliability in industrial automation applications. This model features a tapered shaft design and operates with a 90V DC brake system, ensuring secure and efficient performance. The motor is equipped with an A64IA absolute encoder, providing accurate position feedback for enhanced control. Designed for demanding environments, it delivers consistent torque and speed, making it ideal for applications requiring high precision and reliability. Whether you're upgrading existing machinery or integrating new systems, the A06B-0238-B605#S000 offers the performance and durability needed to meet your operational requirements.
