Manufacturer	Fanuc
Catalog number	a06b-0830-b293
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Brand	Fanuc
Part Number	A06B-0830-B293
Product Type	AC Spindle Motor
Series	A06B-0830
Application Area	Industrial Automation

Description

The Fanuc A06B-0830-B293 is an AC Spindle Motor designed for high-performance applications in industrial automation systems. Manufactured by Fanuc, a leading provider of automation solutions, this motor is engineered to deliver reliable and efficient operation in demanding environments.

While specific technical specifications are not available, similar models in the A06B-0830 series typically offer features such as high-speed rotation, precise control, and robust construction to ensure durability and longevity.

This motor is suitable for integration into various machinery and equipment requiring precise spindle control. Its design emphasizes energy efficiency and minimal maintenance, contributing to reduced operational costs and increased productivity.

The A06B-0830-B293 is compatible with Fanuc's range of servo amplifiers and controllers, facilitating seamless integration within existing automation systems. Its compact design allows for flexible installation options, making it adaptable to different machine configurations.

For detailed specifications and compatibility information, consulting the manufacturer's datasheet or contacting Fanuc directly is recommended.
