

A06B-6058-H006

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6058-h006
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	5.44 kgs
Input Voltage	200–240 VAC
Rated Output Power	2.5 kW
Rated Output Current	15 A
Control Type	Digital servo control
Cooling Type	Forced air cooling

Description

The Fanuc A06B-6058-H006 is a high-performance digital AC servo amplifier from Fanuc's S-Series, engineered for precise single-axis motor control in CNC systems. Designed to drive compatible 20S/30S type servo motors, it ensures reliable digital control and robust performance in industrial automation and machining applications. This amplifier is ideal for OEM replacements or system rebuilds, offering seamless integration with existing Fanuc CNC environments. Key features include a compact design for easy installation, efficient energy consumption, and compatibility with various Fanuc servo motors, making it a versatile solution for enhancing productivity and performance in diverse industrial settings.
