

## A06B-6064-H308#H550

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6064-h308h550
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

### Technical specification

Weight	16.17 kgs
Weight	35.65 lbs
Product Type	AC Digital Spindle Drive
Model	8S/15P Serial
Product Series	A06B-6064
Manufacturer	Fanuc
Part Number	A06B-6064-H308#H550
Category	Podzespoły automatyki przemysłowej

### Description

The Fanuc A06B-6064-H308#H550 is an AC Digital Spindle Drive designed for precision and reliability in industrial applications. Manufactured by Fanuc, a leader in automation technology, this model is part of the A06B-6064 series, known for its advanced features and robust performance. The A06B-6064-H308#H550 is engineered to drive AC spindle motors, offering high-speed control and efficiency. Its compact design allows for easy integration into various CNC systems, making it suitable for a wide range of machining processes. Key characteristics include its compatibility with Fanuc's serial interface, ensuring seamless communication with other components. The drive's construction emphasizes durability, with components designed to withstand the rigors of continuous operation. This model is ideal for applications requiring precise spindle control, such as milling, drilling, and turning operations. Its advanced technology and reliable performance make it a valuable component for enhancing productivity and maintaining high-quality standards in manufacturing environments.
