

A06B-6066-H011

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6066-h011
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	5.16 kgs
Product Type	AC Servo Amplifier
Brand	Fanuc
Part Number	A06B-6066-H011
Product Series	C Series Servo Drive
Application Area	Industrial Automation

Description

The Fanuc A06B-6066-H011 is a high-performance AC servo amplifier designed for precise control in industrial automation applications. Manufactured by Fanuc, a leader in automation technology, this unit is part of the C Series Servo Drive lineup, known for its reliability and efficiency. The A06B-6066-H011 is engineered to deliver optimal performance in various industrial settings, ensuring smooth and accurate operation of machinery. Key features include a robust design capable of withstanding demanding environments, compatibility with Fanuc's advanced control systems, and a user-friendly interface for easy integration and operation. This servo amplifier is ideal for applications requiring precise motion control and high reliability, such as CNC machines, robotics, and automated production lines. Its advanced technology and durable construction make it a valuable component for enhancing the performance and productivity of industrial automation systems.
