

A06B-6066-H244

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6066-h244
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	5.92 kgs
Product Type	Dual-Axis AC Servo Amplifier
Product Series	C Series
Number of Axes	2 axes
Control Type	Position, Speed, and Torque Control
Mounting Type	Vertical/Wall-mounted

Description

The Fanuc A06B-6066-H244 is a dual-axis AC servo amplifier designed for precise motion control in industrial automation systems. Manufactured by Fanuc, a leader in automation technology, this model is part of the C Series, known for its reliability and performance. It is engineered to manage two servo motors simultaneously, making it ideal for applications requiring coordinated motion, such as CNC machines and robotic systems. The amplifier offers precise position, speed, and torque control, ensuring smooth and accurate operation. Built to withstand demanding industrial environments, the A06B-6066-H244 is a robust solution for enhancing automation processes.
