

A06B-6077-H111

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6077-h111
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	2.26 kgs
Current	49 A
Power	13.2 kW
Horsepower	13.2 KW
Cooling Capacity	13.2 kW
Signal Level	230 V
Relay Specifications	230 VAC
Voltage	200 V
Frequency	50 - 60 Hz
Product Type	Converter
Signal Type	230

Description

The Fanuc A06B-6077-H111 is an Alpha Power Supply Module (PSM-11) designed to provide reliable and efficient power delivery for industrial automation systems. Manufactured by Fanuc, a leading provider of automation solutions, this module ensures consistent operation of machinery and equipment in manufacturing and automation settings. Key specifications include an input voltage range of 200-230 VAC, an output voltage range of 283-325 VDC, and a rated output power of 13.2 kW. The module operates with a 3-phase power supply and requires an input current of 49 A. Cooling is achieved through an internal fan, and the module is protected against overload, overcurrent, and overvoltage conditions. Its compact design, weighing approximately 2.26 kg, facilitates easy integration into existing systems. The A06B-6077-H111 is suitable for applications requiring precise power control, such as CNC machines and other automation equipment.
