

## A06B-6079-H108

Industrial automation components

<b>Manufacturer</b>	Fanuc
<b>Catalog number</b>	a06b-6079-h108
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Weight</b>	9.97 kgs
<b>Voltage</b>	283 - 325 V
<b>Power</b>	15 kW
<b>Cooling Capacity</b>	15 kW
<b>Product Type</b>	Module
<b>Signal Level</b>	325 V
<b>Current</b>	115 A
<b>Horsepower</b>	15 KW
<b>Measurement Range</b>	283 - 325

### Description

The Fanuc A06B-6079-H108 is a high-performance servo amplifier module from Fanuc's ALPHA series, designed to drive servo motors in industrial automation systems. This module is engineered for precision and efficiency, ensuring optimal performance in demanding environments. It features a single-axis configuration with a Type A/B interface, suitable for various applications requiring precise motion control. The A06B-6079-H108 operates within a voltage range of 283 to 325 V, delivering a power output of 15 kW and a current rating of 115 A. Its robust design minimizes downtime, allowing for uninterrupted operations in your manufacturing processes. With a weight of approximately 9.97 kg, this module is capable of delivering enhanced power output while maintaining efficiency. The servo amplifier module is crucial for achieving precision control in automated systems, making it indispensable for any modern electrical setup. Invest in the A06B-6079-H108 today and elevate your automation projects to new heights.
