

A06B-6079-H204

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6079-h204
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	4.54 kgs
Product Type	Drive
Signal Level	325 V
Voltage	283 - 325 V
Power	3.4 kW
Horsepower	3.4 KW
Cooling Capacity	3.4 kW
Measurement Range	283 - 325

Description

The Fanuc A06B-6079-H204 is a dual-axis Alpha Servo Module designed for precise motion control in industrial automation applications. Manufactured by Fanuc, a leader in industrial automation components, this module is part of the A06B-6079 series, known for its reliability and performance. The A06B-6079-H204 model features the SVM2-12/40 configuration, providing high-performance servo control for complex machinery. It operates within a voltage range of 283 to 325 VDC and delivers a power output of 3.4 kW, ensuring efficient operation in demanding environments. The module is compatible with Fanuc's Alpha series servo motors, offering seamless integration and optimal performance. Its compact design facilitates easy installation and maintenance, making it suitable for various industrial applications requiring precise and reliable motion control.
