

## A06B-6079-H205

Industrial automation components

<b>Manufacturer</b>	Fanuc
<b>Catalog number</b>	a06b-6079-h205
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Weight</b>	4.67 kgs
<b>Input Voltage</b>	200-230V AC, 3-phase V
<b>Output Current</b>	15A
<b>Control Type</b>	Digital
<b>Feedback Type</b>	Analog or Digital
<b>Dimensions</b>	380mm x 90mm x 260mm
<b>Weight</b>	7.5 kg
<b>Communication Interface</b>	RS-232C

### Description

The Fanuc A06B-6079-H205 is a dual-channel servo amplifier module designed for precise motion control in industrial automation systems. Manufactured by Fanuc, a leader in automation technology, this module is part of the A06B-6079 series and is compatible with Alpha 20/40 series servo motors. It operates with an input voltage of 200-230V AC, 3-phase, and provides a maximum output current of 15A. The module features a digital control type and supports both analog and digital feedback systems. Its compact dimensions (380mm x 90mm x 260mm) and weight of approximately 7.5 kg make it suitable for integration into various automation setups. The A06B-6079-H205 is equipped with an RS-232C interface for communication with CNC controllers, ensuring seamless integration and control within automated environments.
