

A06B-6079-H206

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6079-h206
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	10.05 kgs
Voltage	230 V
Product Type	Drive
Signal Type	230
Current	12.5 A
Cable Specification	40 × 2
Signal Level	230 V

Description

The Fanuc A06B-6079-H206 is a high-performance 2-axis Alpha Servo Module, Model SVM2-40/40, engineered for precise and efficient control in industrial automation applications. Designed by Fanuc, a leader in automation technology, this servo amplifier ensures smooth operation and reliable performance in demanding environments. Key features include a rated input voltage of 283–325V, a maximum output voltage of 230V, and a rated output current of 12.5A per axis, delivering a total power output of 5.3kW. The module's dimensions are 70 mm in height, 360 mm in length, 320 mm in width, and it weighs 4.68 kg. Its robust construction and advanced design make it suitable for various industrial applications requiring precise motion control.
