Industrial automation components

| | |
|-----------------------|----------------------------------|
| Manufacturer | Fanuc |
| Catalog number | a06b-6079-h305 |
| Category | Industrial automation components |
| Product type | Industrial automation components |
| Status | Active product |

Technical specification

| | |
|--------------------------------|-----------------------|
| Weight | 9.53 kgs |
| Input Voltage | 283–325 V |
| Output Voltage | Up to 230 V |
| Output Current (L Axis) | 3 A |
| Output Current (M Axis) | 3 A |
| Output Current (N Axis) | 12.5 A |
| Dimensions | 42 cm x 22 cm x 62 cm |
| Weight | 9.53 kg |

Description

The Fanuc A06B-6079-H305 is a high-performance 3-axis Alpha Servo Module (Model SVM3-12/12/40) designed for precise motion control in industrial automation applications. Manufactured by Fanuc, a leader in automation technology, this module offers reliable performance for complex machinery operations. Key features include an input voltage range of 283–325 V, a maximum output voltage of 230 V, and output currents of 3 A for the L and M axes, and 12.5 A for the N axis. The module is housed in a compact enclosure measuring 42 cm in width, 22 cm in height, and 62 cm in depth, with a weight of 9.53 kg. This servo module is ideal for applications requiring synchronized control of multiple axes, such as CNC machines and robotic systems, ensuring high precision and efficiency in motion tasks.
