

A06B-6081-H103

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6081-h103
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	2.35 kgs
Voltage	283 - 325 V
Horsepower	3.8 KW
Cooling Capacity	3.8 kW
Measurement Range	283 - 325
Product Type	Converter
Power	3.8 kW
Signal Level	325 V

Description

The Fanuc A06B-6081-H103 is an Alpha Power Supply Module, specifically the Model PSMR-3, designed to provide reliable power solutions for industrial automation systems. Operating with an input voltage of 200-230V AC and delivering a DC output of 283-325V at 3.8 kW, this module ensures efficient and stable power supply for various applications. It is compatible with Fanuc's Alpha series servo amplifiers and requires a regenerative discharge unit for optimal performance. This module is suitable for use in CNC machines, robotics, and other automation equipment that demand consistent power delivery. Its robust design and high-quality components make it a dependable choice for enhancing the performance and longevity of industrial automation systems.
