

A06B-6081-H106

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6081-h106
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	4.04 kgs
Voltage	200 - 230 V
Current	35 A
Product Type	Module
Signal Level	230 V
Power	94 kW
Frequency	50 - 60 Hz
Horsepower	94 KW
Cooling Capacity	94 kW
Measurement Range	200 - 230
Relay Specifications	35 A

Description

The Fanuc A06B-6081-H106 is an ALPHA Power Supply Module Model PSMR-5.5, engineered to deliver reliable power solutions for industrial automation systems. Designed for 50/60 Hz operation, this three-phase module accepts an input voltage of 200-230 V and provides an output voltage ranging from 283 to 325 V, with a current capacity of 35 A. It delivers a power output of 94 kW, ensuring efficient and consistent performance for CNC applications. This module is part of Fanuc's A06B-6081 series, known for its durability and high performance in demanding industrial environments. The A06B-6081-H106 is suitable for various industrial settings that require a dependable power supply to maintain operational continuity and efficiency.
