

A06B-6085-H102

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6085-h102
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	5.60 kgs
Input Voltage	400V
Interface Type	PWM Type A/B
Dimensions	21.00 × 5.00 × 48.00 cm
Weight	5.60 kg
Product Type	ALPHA Servo Module

Description

The Fanuc A06B-6085-H102 is an ALPHA Servo Module designed for high-performance servo control in industrial automation systems. Manufactured by Fanuc, a leader in automation technology, this module is part of the A06B series and is specifically engineered for single-axis control applications. It operates with a 400V input and features a PWM interface of Type A/B, ensuring compatibility with various Fanuc CNC systems. The module's compact design, with dimensions of 21.00 × 5.00 × 48.00 cm and a weight of 5.60 kg, allows for efficient integration into existing setups. Its robust construction and advanced control capabilities make it suitable for demanding applications in manufacturing and robotics, where precision and reliability are paramount.
