### Technical specification

|                          |             |
|--------------------------|-------------|
| <b>Weight</b>            | 8.34 kgs    |
| <b>Voltage</b>           | 200 - 230 V |
| <b>Current</b>           | 63 A        |
| <b>Measurement Range</b> | 200 - 230   |
| <b>Power Supply Type</b> | AC          |
| <b>Signal Type</b>       | 230         |
| <b>Product Type</b>      | Converter   |
| <b>Signal Level</b>      | 230 V       |

### Description

The Fanuc A06B-6087-H115 is a high-performance power supply module designed for industrial automation applications, particularly in CNC systems. Manufactured by Fanuc, a leader in automation technology, this module ensures reliable power conversion for servo motors and amplifiers. It operates with an input voltage range of 200-230 V AC or DC, delivering a rated output of 283-325 V DC at 17.5 kW, and supports a rated current of 63 A. The module is air-cooled and intended for vertical or wall-mounted installation. Its robust design and precise power regulation make it ideal for demanding industrial environments, ensuring optimal performance and longevity of connected equipment.
