

## A06B-6087-H130

Industrial automation components

<b>Manufacturer</b>	Fanuc
<b>Catalog number</b>	a06b-6087-h130
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Weight</b>	10.43 kgs
<b>Voltage</b>	200 - 230 V
<b>Signal Type</b>	230
<b>Current</b>	127 A
<b>Frequency</b>	50 - 60 Hz
<b>Product Type</b>	Converter
<b>Signal Level</b>	230 V
<b>Relay Specifications</b>	230 VAC

### Description

The Fanuc A06B-6087-H130 is a high-performance power supply module designed for industrial automation applications. Manufactured by Fanuc, a leader in automation technology, this module is part of the Alpha Series and is specifically engineered to provide reliable power to Fanuc servo amplifiers and motors. It operates with a rated input of 200-230 V AC, 127 A at 200 V, 50/60 Hz, 3-phase, and delivers a rated output of 283-325 V DC, 35 kW. The module is housed in a compact design, measuring approximately 150 mm in width, 380 mm in height, and 307 mm in depth, with a weight of 10.7 kg. It is compatible with various Fanuc control systems, including the 16iTA, 16iMA, 18iTA, 18iMA, 21iTA, and 21iMA series. This power supply module is ideal for applications requiring stable and efficient power delivery to servo systems, ensuring optimal performance and longevity of connected equipment.
