

## A06B-6089-H105

Industrial automation components

<b>Manufacturer</b>	Fanuc
<b>Catalog number</b>	a06b-6089-h105
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Weight</b>	4.99 kgs
<b>Voltage</b>	200 - 230 V
<b>Frequency</b>	50 - 60 Hz
<b>Product Type</b>	Drive
<b>Signal Type</b>	230
<b>Current</b>	17 A
<b>Signal Level</b>	230 V
<b>Relay Specifications</b>	80 A

### Description

The Fanuc A06B-6089-H105 is a single-axis AC servo amplifier from Fanuc's ALPHA series, designed for high-performance industrial applications. Operating on a 200–230 V three-phase input, it delivers a maximum output voltage of 230 V AC with a rated output current of 18.7 A for the L-axis. This servo amplifier supports both 50 Hz and 60 Hz frequencies, ensuring versatility across different industrial environments. Weighing approximately 5.0 kg, the A06B-6089-H105 is engineered for compactness and durability, making it suitable for integration into CNC machines and various automation equipment. Its robust design ensures reliable servo drive performance, contributing to the efficiency and precision of industrial automation systems.
