

A06B-6089-H204

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6089-h204
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	5.62 kgs
Voltage	AC
Current	40 A
Product Type	Drive
Relay Specifications	12 A

Description

The Fanuc A06B-6089-H204 is a dual-axis AC servo amplifier unit, model SVU2-12/40, designed for precise control in industrial automation applications. Manufactured by Fanuc, a leader in automation technology, this unit is part of the A06B-6089 series, known for its reliability and performance. The A06B-6089-H204 is engineered to handle dual-axis control, making it suitable for complex machinery requiring synchronized movements. It operates with an AC voltage input and delivers a nominal output of 230V, providing 3.0A for one axis and 8.8A for the other, ensuring efficient power distribution. The unit's compact design allows for flexible integration within various machine configurations, optimizing space utilization. For detailed specifications and installation guidelines, refer to the manufacturer's datasheet and installation memo.
