

A06B-6089-H208

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6089-h208
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	5.58 kgs
Voltage	AC
Current	80 A
Relay Specifications	80 A
Product Type	Drive

Description

The Fanuc A06B-6089-H208 is a dual-axis AC servo amplifier unit, model SVU2-80/80, designed for precise control in industrial automation applications. Manufactured by Fanuc, a leader in automation technology, this unit offers reliable performance for CNC machines and robotic systems. Key features include an input voltage range of 200–230 V, output voltage up to 230 V, and a maximum output current of 10 A per axis. The compact design measures 90 x 380 x 285 mm and weighs approximately 5.8 kg, facilitating easy integration into various systems. The A06B-6089-H208 is part of Fanuc's Alpha series, known for high-performance servo amplifiers. This model is suitable for applications requiring dual-axis control, such as multi-axis CNC machines and robotic arms, ensuring efficient and precise operation in demanding environments.
