

A06B-6089-H209

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6089-h209
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	5.44 kgs
Voltage	AC
Relay Specifications	12 A
Current	80 A
Product Type	Drive

Description

The Fanuc A06B-6089-H209 is a high-performance servo amplifier designed for precise control in industrial automation applications. Manufactured by Fanuc, a leader in automation technology, this model is part of the AlphaSVU series, specifically the 2-12/80 version, indicating its capability to manage two axes with a power rating of 80 Amps. It operates on AC voltage, ensuring compatibility with standard industrial power supplies. The unit measures 290 mm in height, 380 mm in length, and 90 mm in width, with a weight of 10.00 kg, facilitating easy integration into existing systems. This servo amplifier is engineered to deliver reliable and efficient performance, making it suitable for applications requiring precise motion control and high reliability.
