

A06B-6093-H112

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6093-h112
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	1.32 kgs
Input Voltage	220-240 V (1-phase) / 200-240 V (3-phase)
Output Current	5.9 A
Interface	FSSB
Shaft Type	TPR
Product Type	Beta Series Servo Amplifier Unit

Description

The Fanuc A06B-6093-H112 is a high-performance Beta Series Servo Amplifier Unit (SVU-20) designed for precise control of industrial machinery. This single-axis drive features an FSSB interface, enabling seamless communication with Fanuc controls via fiber optic connections. It operates with a rated input of 220-240 V (1-phase) or 200-240 V (3-phase), delivering a rated output current of 5.9 A. The unit is compact, facilitating installation in confined spaces, and is equipped with a TPR shaft for secure mounting. Ideal for applications requiring high precision, the A06B-6093-H112 ensures reliable and efficient operation in various industrial settings.
