

A06B-6093-H113

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6093-h113
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	3.03 kgs
Voltage	220 - 240 V
Current	12.5 A
Product Type	Drive
Signal Level	240 V
Signal Type	240
Relay Specifications	240 VAC

Description

The Fanuc A06B-6093-H113 is a high-performance servo amplifier unit designed for precise control in industrial automation applications. Manufactured by Fanuc, a leader in automation technology, this model is part of the Beta Servo Unit (SVU-40) series and features the FSSB interface, ensuring seamless integration with compatible systems. Operating on a voltage range of 220-240 VAC and delivering a rated output current of 12.5 A, it is engineered to handle demanding tasks with reliability. The device is air-cooled and intended for vertical or wall-mounted installation, making it versatile for various setups. Its robust design includes protection features such as overload and overcurrent protection, ensuring safe operation in diverse environments. The A06B-6093-H113 is ideal for applications requiring high precision and efficiency, such as CNC systems and other automated machinery.
