

A06B-6096-H104

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6096-h104
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	1.81 kgs
Input Voltage	283-325V DC V
Output Voltage	230V AC V
Output Current	12.5A
Dimensions	60mm x 307mm x 380mm
Weight	1.81 kg

Description

The Fanuc A06B-6096-H104 is a single-axis servo amplifier module designed for Fanuc's ALPHA series servo motors, specifically the 40L model. Operating within a rated input voltage range of 283-325V DC and delivering a maximum output voltage of 230V AC, it provides a rated output current of 12.5A on the L axis. This module is compatible with Fanuc controls 15i, 16i, 18i, 20i, 21i, and above, facilitating precise torque control in closed-loop systems. The A06B-6096-H104 is equipped with an external heatsink, measuring 60mm in width, 307mm in depth, and 380mm in length, ensuring efficient thermal management during operation. For detailed specifications and compatibility, refer to the manufacturer's datasheet.
